Professional Summary

Data Analyst with hands-on experience across a 10-project portfolio in real estate, healthcare, telecommunications, sports, and supply-chain analytics. Skilled in SQL, Power BI, Excel, Python, Power Query, and DAX to validate data, build dimensional models, develop KPIs, and create interactive dashboards that communicate operational trends.

Education

Beni-Suef National University **2023 – Present**
B.Sc. in Computers and Artificial Intelligence — Medical Informatics *GPA: 3.5 / 4.00*

Work Experience

Route **Feb 2026 – Sep 2026**
Data Analyst Intern *Cairo, Egypt*

- Analyzed 73,000+ records across 10 end-to-end data analytics projects, maintaining a 100% on-time delivery rate across 5 business domains.
- Engineered 10 interactive Power BI dashboards using Star, Snowflake, and Galaxy schemas, reducing reporting turnaround time by 40% and saving 15+ hours monthly.
- Constructed 30+ custom DAX measures and 15+ KPI frameworks across multi-table models to evaluate sales velocities and monitor customer attrition metrics.
- Automated ETL workflows using SQL, Python, and Power Query across 8+ pipelines, cutting manual data-cleaning time by 50% with 100% schema integrity.

Projects

NOR Developments — Real Estate Sales & Installment Intelligence https://github.com/Kerelos-Nakhla/NOR-Dashboarb
Power BI, DAX, Power Query, Excel, Galaxy Schema

- Analyzed **73,943 units** across **8 developments** (**3,088 contracts, 21,616 installment records**), building a Galaxy Schema with 2 fact tables and 6 dimension tables.
- Engineered DAX KPIs to track sales velocities, collection efficiencies, overdue installment balances, and bank-versus-cash risk exposure.

FIFA World Cup 2026 Fixtures and Tournament Preview https://github.com/Kerelos-Nakhla/The-Road-To-Glory
Power BI, Python, Beautiful Soup, Pandas, DAX

- Collected and structured publicly available fixture, team, and venue data for the 2026 tournament across **48 teams, 104 matches, and 16 host venues** using Python, Beautiful Soup, and Pandas.
- Built an interactive Power BI dashboard to explore match scheduling, venue allocation, team participation, and tournament format; documented data sources and assumptions in the repository.

HR Attrition & Workforce Risk Analysis https://github.com/Kerelos-Nakhla/HR-Attrition
Power BI, DAX, Power Query, Exploratory Data Analysis, Excel

- Analyzed **1,470 employee records** across **35 organizational, compensation, and demographic attributes** to identify descriptive patterns associated with employee attrition.
- Identified a **20.1 percentage-point attrition disparity** between overtime and non-overtime staff (**30.5% vs. 10.4%**), evaluating commute distance and job-role satisfaction factors.

Andalusia Healthcare Analytics https://github.com/Kerelos-Nakhla/Andalusia-Dashboard
Power BI, DAX, Power Query, Relational Modeling, Excel

- Integrated **8 operational datasets** covering billing, marketing, CRM, payments, and clinical units into a unified Power BI relational model.
- Engineered DAX KPI measures tracking realized revenue against targets across departments, surfacing departmental variance and YoY revenue trajectory.

Skills

BI & Visualization: Power BI, Power BI Service, Tableau, DAX, Power Query, Excel (Pivot Tables, Advanced Formulas, Dashboards), Figma

Programming & Databases: SQL, MySQL, Python (Pandas, NumPy, Matplotlib, Seaborn, Beautiful Soup)

Data Modeling & ETL: Dimensional Modeling (Star, Snowflake, Galaxy Schemas), ETL, Data Cleaning, Data Transformation, Data Validation

Professional & Soft Skills: Critical Thinking, Analytical Problem Solving, Attention to Detail, Cross-Functional Communication, Business Presentation, Stakeholder Reporting, Team Collaboration, Time Management, Adaptability, Requirements Gathering

Developer Tools: Git, GitHub

Certifications

- **Data Analysis Track Certificate** — Route Academy (Cycle 5, Top Performer)
- **Advanced Data Analytics** — National Telecommunication Institute (NTI)
- **Linear Algebra for Machine Learning and Data Science** — DeepLearning.AI
